

Frequently Asked Questions

SUNROOF

Question 1 – Is a Webasto Hollandia sunroof a quality product?

Webasto is a successful systems manufacturer to worldwide automotive manufacturers supplying sunroofs for virtually every make of car. Webasto produces 5 million units a year. With more than 50% of sunroofs factory installed by car manufacturers worldwide being from Webasto. That's the quality that the world's biggest automotive manufacturers demand, and that's what you get when you buy from us. Webasto also offers a 3 year Australia wide warranty.

Question 2 – What about installation quality?

In addition to Webasto's product quality, you're also buying high-grade, dependable installation technology. Only qualified installation partners fit Hollandia sunroofs, with all our fitters fully trained and certified.

Question 3 – Which cars can be fitted with sunroofs?

A Hollandia sunroof can be installed into virtually any car – older models included.

Question 4 – Will a sunroof reduce the value of my car?

No, the value of the car will not decrease. High quality sunroofs are becoming more and more popular, so you will find that a car fitted with one of these sunroofs will be more appealing to potential buyers.

Question 5 – Sunroofs often develop leaks.

Leaks can usually be accounted for by poor quality fitting and no-name units. Brand-name, Hollandia, sunroofs from Webasto always offer top quality and are installed only by certified partners.

Question 6 – My car is air-conditioned, is there any point fitting a sunroof?

Yes there is, because sunroofs and air-conditioning offer two completely different sets of advantages. The air-conditioning system keeps the temperature inside the car down. The sunroof will ensure an ample supply of fresh air to make driving more comfortable. In addition you will have natural light inside the passenger compartment 365 days a year.

Question 7 – A sunroof leaves the inside of the car exposed to direct sunlight and the heat of the sun's rays.

All Hollandia glass sunroofs are equipped with Venus® glass that protects against heat and ultraviolet light. This safety glass is specially tinted throughout to reflect 99% of UV radiation.

Question 8 – What about the safety of my car when the sunroof is installed?

Independent tests have proven that installing a Webasto sunroof has no detrimental effect on the car's stability or on its ability to resist collision impacts.

Question 9 – Is it necessary to remove the roof stiffener when installing a sunroof?

This depends on the type of car – Webasto offers two possibilities: the Hollandia 300 DeLuxe medium can, in most cases, be installed in front of the roof stiffener. For the other Hollandia models Webasto specially developed a roof stiffener replacement system (RSR) therefore allowing Hollandia sunroofs to be installed in virtually any type of car.

The RSR system is TUV approved (TUV is an independent German testing and certification authority).

Question 10 – Is a sunroof draughty?

There is an integrated wind deflector to minimise draughts even at high speeds. Draughts are much less of a problem than when you drive with the side windows open.

Question 11 – Is a sunroof noisy?

These modern, aerodynamically optimised roof-systems significantly reduce the noise level inside the passenger compartment. Wind noise with the sunroof open or tilted is negligible by comparison with the noise level you experience with the side windows open.

Question 12 – There are only certain times of the year when I can experience any benefit from a sunroof.

A sunroof made of glass will always make the interior of the car seem brighter and more spacious and you'll be able to enjoy the panoramic feeling at any time of the year. You have a lot of positioning options with a sunroof, allowing use of it all year round.

Question 13 – Can I install a sunroof in my car if it is equipped with side and curtain air bags?

Yes. Tests have been carried out by an independent test centre – there is no effect on the operation of the air bags when a new Hollandia sunroof is installed.

Question 14 – Will I have less headroom with a sunroof?

By installing a Webasto Hollandia sunroof your headroom will not be compromised. The sunroof will not protrude any further than the current head lining. The glass roof makes the passenger compartment seem more spacious all year round – even when the panel is closed. The interior is brighter, so you have a greater sense of space.

Question 15 – A sunroof is too expensive.

A sunroof doesn't just mean fresh air and light: it is also a low-cost way of experiencing that feeling of driving an open-top car. The cost-performance ratio is ideal: virtually no other aftermarket accessory can claim that. The sunroof is a technologically high-grade product that can be used precisely in accordance with individual wishes and preferences.
