

Camper vans
Diesel Cook Top

Cook safely and conveniently in your camper van with the Webasto Diesel Cooker X 100

In general, cooking in a camper van means cooking with gas. However practical this is, it is questionable in terms of design, cleanliness, and safety. And what happens when the gas cylinder is empty? Webasto has the solution: The Webasto Diesel Cooker X 100.

The heat source for this cooker is a diesel burner which is integrated into the cooker. This heats a CERAN® cooking surface which has room for two small pots or saucepans. Only the glass ceramic cooking surface is visible, and this is very robust and easy to care for, just like at home. Inside the van there is therefore no longer an open flame, and the exhaust is led to the outside – in the same way as Webasto heaters.

The product benefits of the Webasto Diesel Cooker X 100

- Suitable for all diesel-fuelled camper vans
- Elegant design
- Very safe thanks to absence of open flames
- Easy to use by means of control unit with installation adaptability
- Easy to clean
- Low current and fuel consumption
- Really quiet
- Exhaust existing to the outside
- Hotplate displays residual heat
- High cooking power up to 1,800 Watt
- Even in the mountains it works dependably thanks to altitude compensation switch
- Robust, high-quality CERAN® cooking surface
- Rapid installation thanks to universal installation kit

Webasto Diesel Cooker X 100

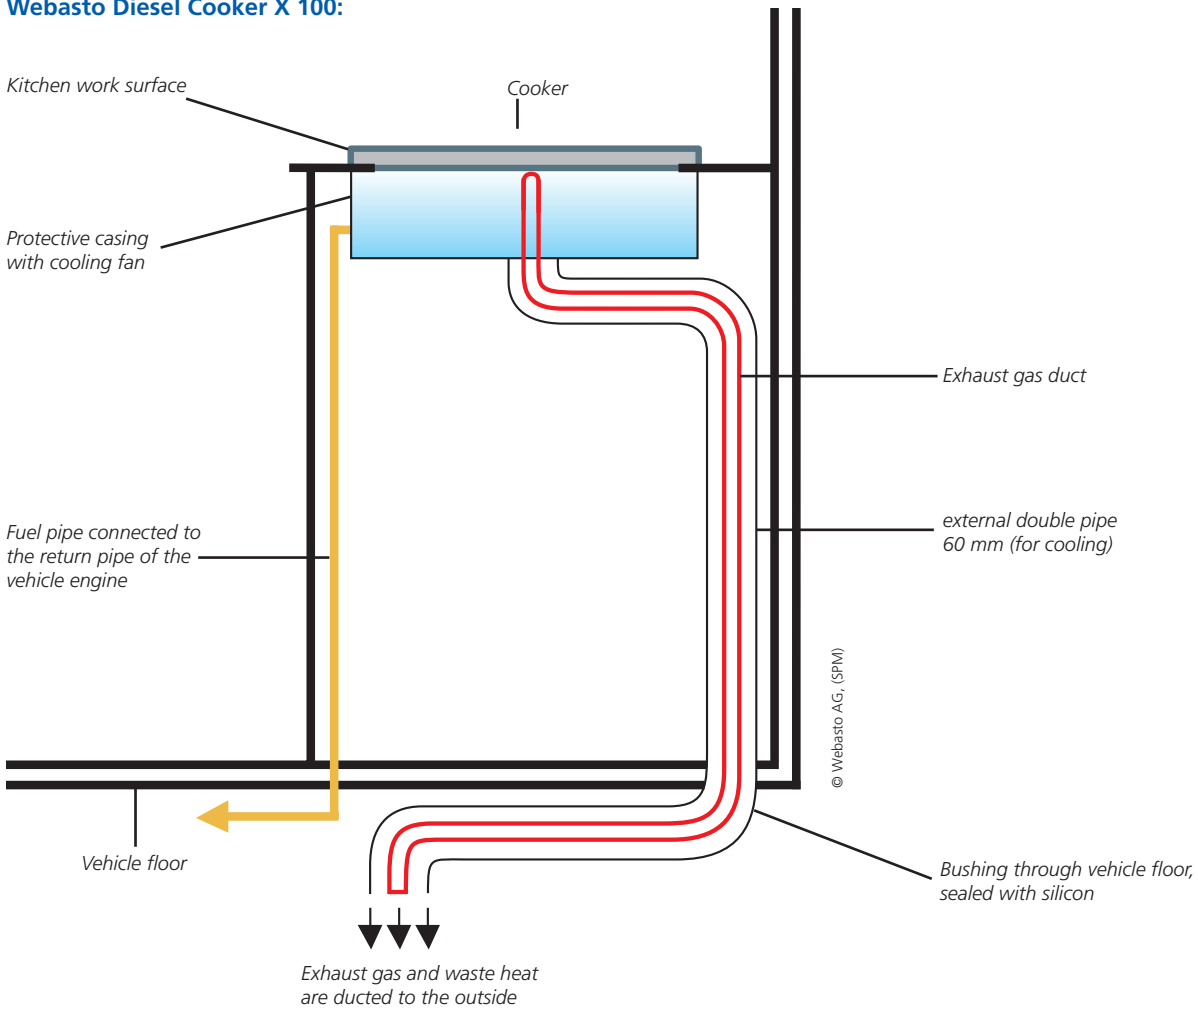

The elegant and clean solution to cooking in a camper van. Simple to use, and quick to clean

The control unit

Easy to use, with infinitely variable temperature preset, as well as an altitude switch for use in the mountains.

Installation diagram for the Webasto Diesel Cooker X 100:

The cooker can be installed without difficulty in most vehicles. The cooker is inserted from above into the recess in the kitchen work surface. The protective casing is fitted from below, and has an integrated cooling fan which ensures that the waste heat is ducted from the underside of the cooker to the outside via a flexible coaxial pipe.

Technical specifications for the Webasto Diesel Cooker X 100:

Cooking power (in W)	Voltage (in V)	Fuel	Fuel consumption (in l/h)	Power consumption (in A)	Warm-up time	Dimensions (WxDxH) Ceran hotplate	Dimensions (BxTxH) Protective casing	Weight (in kg)
900 - 1.800 (infinitely variable)	12	Diesel	0.09 - 0.19	0.43 A (5 Watt) max. when starting approx. 8 A for 6 min	~ 3 min	46 x 31 x 0.7	54 x 34 x 15 (2 cm Exhaust nozzle)	8 (Cooker unit) 1.5 (lower casing)

Ident.-No. WA 90000A, available from October 2005

The C5 concept stands for comfort and convenience on the road - cosy warmth or refreshing coolness, together with total comfort from increased light and fresh air - all year round.
